

GRAFF launches the serene TERRA collection

GRAFF, the worldwide manufacturer of innovative faucets, introduces TERRA; a collection that is essential, soft and natural like earth. TERRA offers modern cutting-edge solutions that are ecologically sound and look forward to technological progress. The cylindrical, smooth and bright shape, recreates a relaxing atmosphere of harmony in the bathroom, like a journey into nature where the flow of the water and the fascinating forms, capture you and lull you gently.

Designed by GRAFF Design Studio, TERRA is a collection with several pieces and accessories. The series is available in several finishes: polished chrome, brushed nickel, matte black and matte white. The whole collection can be viewed on www.graff-faucets.com

Terra is the most exquisite collection to prevail and endure over time, a group of elements that are perfectly integrated in today's world and respond to its sudden changes. Even in the casting, finishing and galvanic treatments, GRAFF adopts a zero discharge system that recycles 100 % of brass and paper. In line with its strong commitment to environmental sustainability, the Terra collection is one of the most sustainable by the American company. The collection is manufactured in solid brass with a minimum level of nickel and lead and a 5-year warranty.
