## CRYSTAL CLEAR

The ultimate in luxury for your bathroom or powder room, these crystal handles from Dornbracht reflect light left and right. The sleek design is powerful yet delicate with a bold sophistication that commands attention but *requires* none. [birddecorativehardware.com](http://birddecorativehardware.com)

# MODERN MARVELS

Innovation and design collide to bring the boldest and brightest to the bath and beyond.

## POWER GRID

The ideal from Kallista to *Live Artfully* has been brought to life with the new GRID collection of faucets and handles. The geometric design pays homage to the clean, minimalist forms birthed in the De Stijl movement, marking the shift from excessive decoration to precise works of art. 3D Systems technology is used to create the faucet through 3D printing, and the result is a master class in the study of negative space. The handles are cast, hand-buffed, and powder-coated, creating a lightly textured look. Form and function are artfully paired for a one-of-a-kind look that adds a dose of luxe to any landscape. ## COVERSTORY

These mix-and-match faucet handles from Graff are made of real Italian marble from the Tuscany region and offered in three variations. Choose any of seventeen brass finishes to complement the marble for a completely custom and beautiful combination. The handles are part of the new MOD+ collection intended to weave iconic colors, materials, and functionality together to create ultimate versatility and aesthetic. The brass base is thoughtfully designed, and a brass clip is added for both original design and maximum movement. [fergusonshowrooms.com](http://fergusonshowrooms.com)
