

PRESS RELEASE

SADE COLLECTION
A HYMN TO ALL FORMS OF ART

GRAFF, the internationally recognized manufacturer of luxury faucets, shower systems, and bathroom accessories, highlights the Sade collection as an expression of exquisite craftsmanship and world-class design that have always distinguished the company.

A contemporary design icon, Sade celebrates art and evokes a feeling of sophistication, that defines a new way of experiencing living spaces. It embodies simplicity and elegance, like a hymn to all forms of expressive art. The sleek silhouette of Sade consisting of a curved, flat spout, makes its minimal design its strongest point.

GRAFF bathroom and kitchen products are available in over 20 stunning finishes made with cutting-edge production processes that adhere to the highest environmental standards. Premium 24K Gold finishes, offered in polished and brushed options, display luxury and modern elegance and have become increasingly popular for contemporary interiors. Another noteworthy GRAFF finish is the Steelnox® — think Satin Nickel, but a patented fingerprint-resistant finish that is extremely durable. GRAFF's expansive portfolio of finishes also includes powder-coated finishes as well as PVD finishes, all developed with modern technology for timeless beauty that is made to last.
